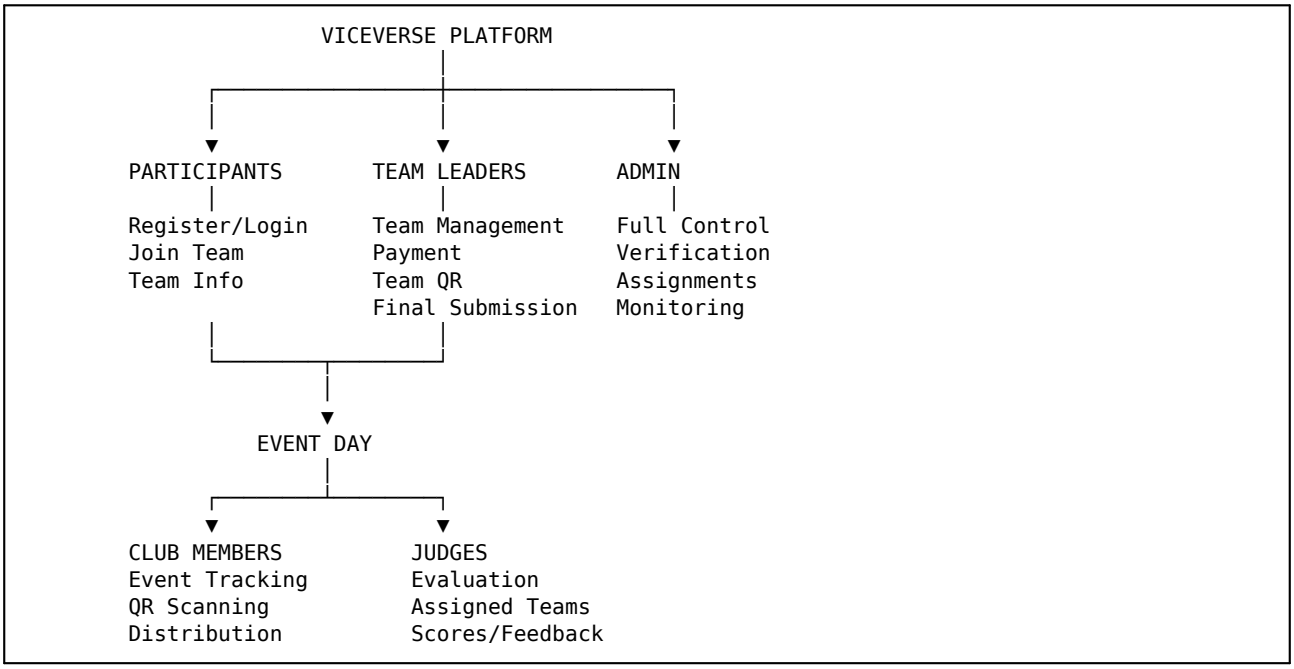
# VICEVERSE Ideathon Platform

Complete flow, role-wise flows, and how each part works

## Part 1: Complete Flow of VICEVERSE

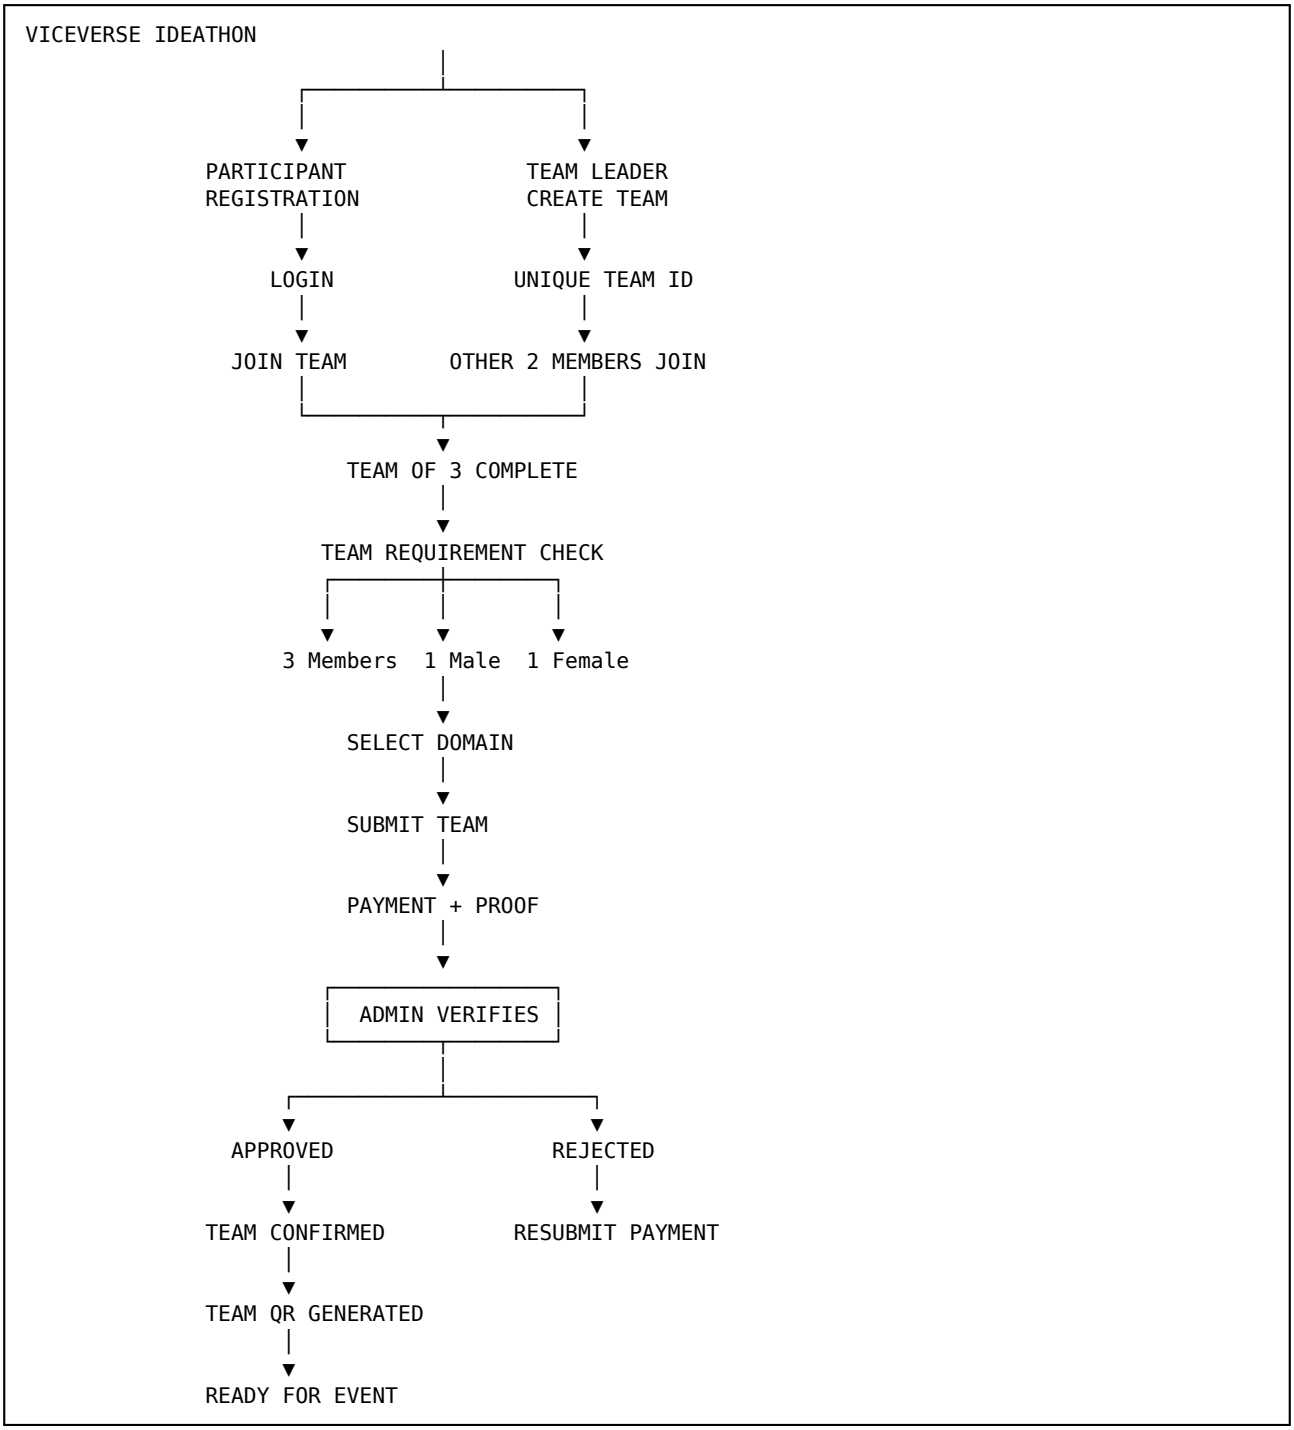
VICEVERSE is a platform that runs an ideathon from start to finish. Five kinds of users take part: **Participants**, **Team Leaders**, **Club Members**, **Judges** and the **Admin**. The charts below show the whole platform first, then each stage in order.

### 1.1 Platform Overview



**How it works.** Participants and Team Leaders work on the pre-event side: registering, forming teams, paying and submitting. The Admin has full control over everything: verification, assignments and monitoring. Once the event day arrives, Club Members take over event tracking (QR scanning and distribution of goodies, lunch and snacks) while Judges take over evaluation of their assigned teams with scores and feedback.

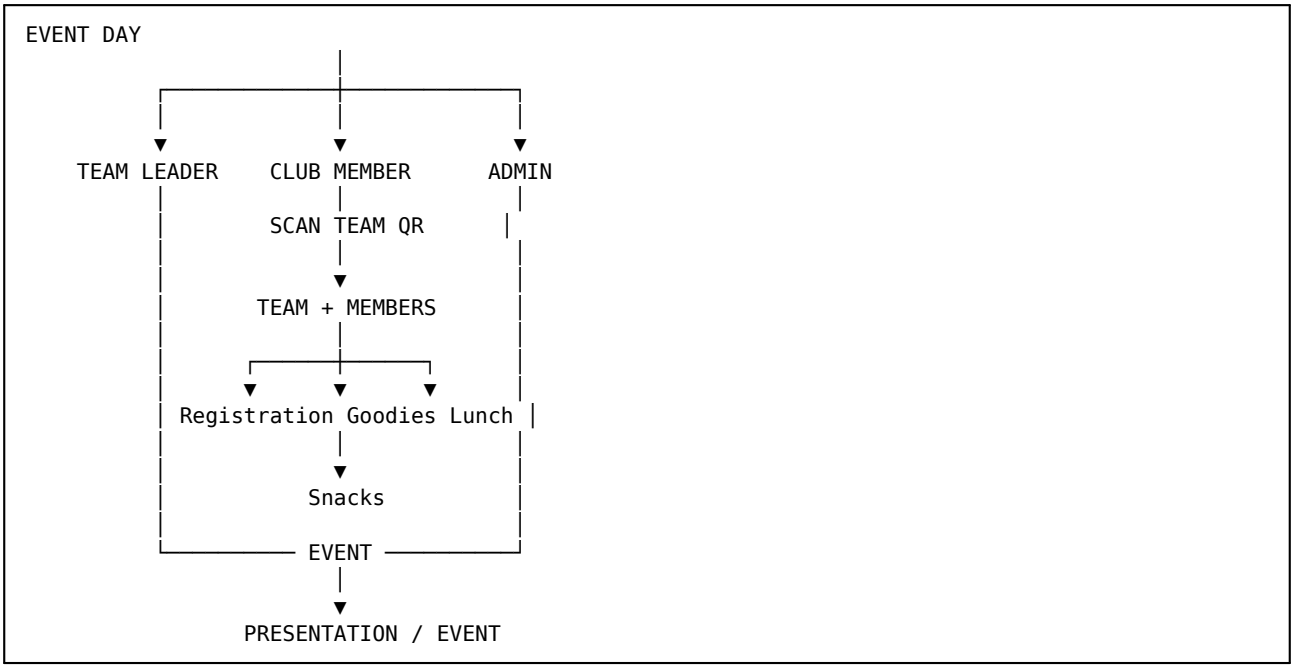
## 1.2 Registration to Ready for Event



**How it works.**

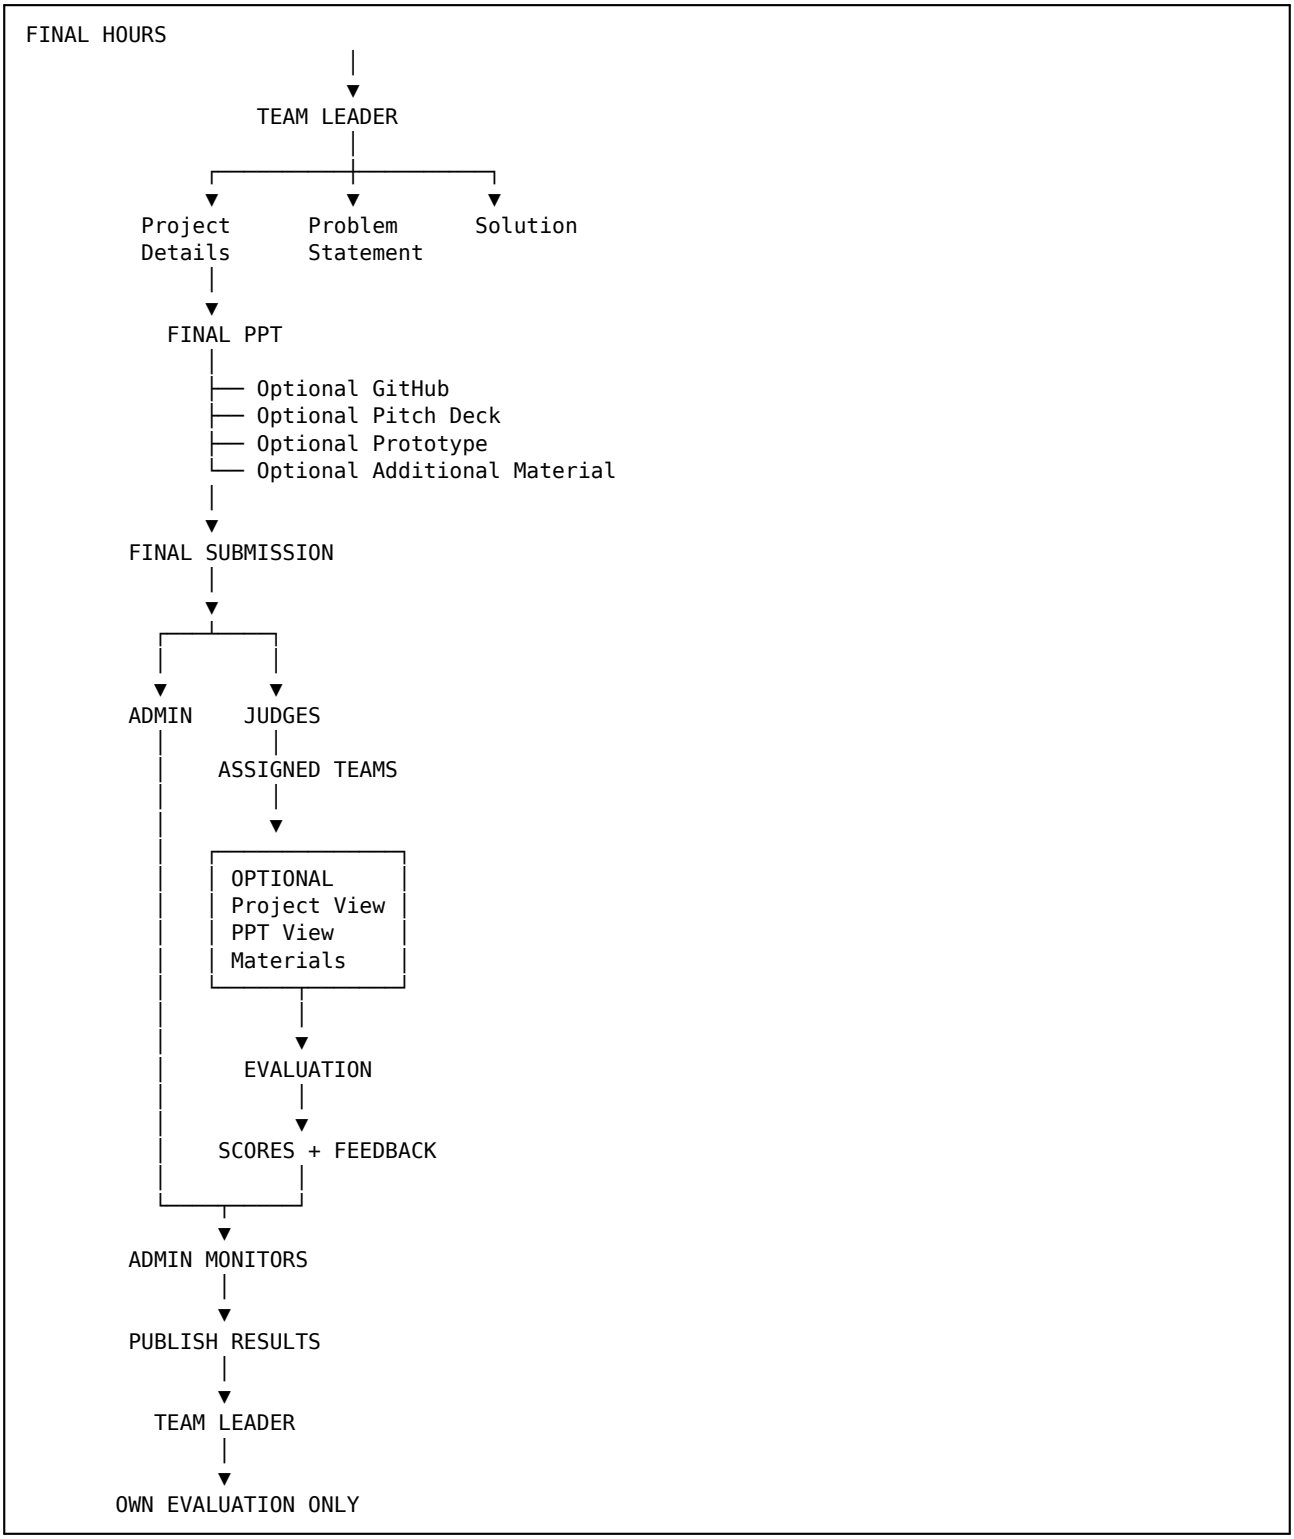
- A person registers and logs in as a participant. One of them creates the team and becomes the **Team Leader**. The system generates a unique Team ID.
- The other two members log in and join the team using that Team ID, so the team has 3 members.
- The system checks the team requirement: exactly 3 members, with at least 1 male and 1 female.
- The team selects a domain and submits the team.
- The Team Leader pays and uploads payment proof.
- The Admin verifies the payment. If **approved**, the team is confirmed and a team QR is generated. If **rejected**, the team must resubmit the payment.
- With a confirmed team and a QR code, the team is ready for the event.

### 1.3 Event Day



**How it works.** On the event day, the Club Member scans each team's QR code. The system shows the team and its members, and the Club Member marks Registration, Goodies, Lunch and Snacks. The Team Leader and the Admin are part of the event: the Team Leader works on the project with the team, and the Admin monitors activity. The day ends with the presentation / event itself.

### 1.4 Final Hours to Results



**How it works.**

- In the final hours, the Team Leader enters the project details: project, problem statement and solution.
- The Team Leader uploads the **Final PPT**. This is compulsory before final judgement. GitHub repository, pitch deck, prototype (simulation or circuit design) and additional material are optional.
- The Team Leader makes the final submission. The Admin and the Judges can then see it.
- Each Judge opens their assigned teams, optionally views the project, PPT and materials, and gives scores and feedback.

- The Admin monitors all evaluations and then publishes the results.
- After publication, each Team Leader can see only their own team's evaluation.

# Part 2: Roles and Their Flows

## 2.1 Participant

The participant has a very simple role: get an account, join a team, and wait for the team to be confirmed.

### Participant Flow

```
PARTICIPANT
    ↓
REGISTER
    ↓
Enter Personal Details
    ↓
Email ID
Phone Number
Password
    ↓
LOGIN / LOGOUT
    ↓
JOIN/EXIT A TEAM
    ↓
WAIT
```

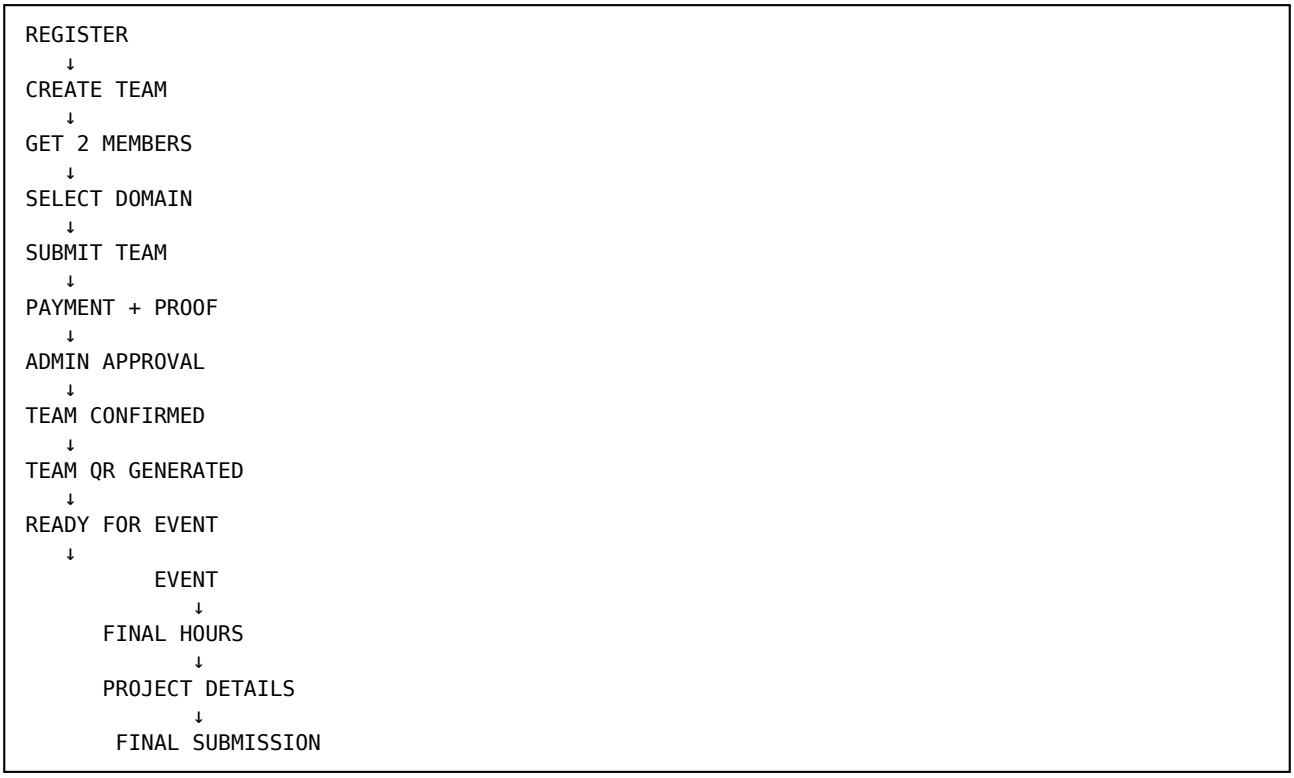
**How it works.**

- The participant registers with Email ID, Phone Number and Password, plus personal details.
- After logging in, the participant joins a team using the Team ID given by the Team Leader. They can also exit a team using the Team ID.
- The participant can view basic information about the team and can log out.
- After that the participant waits while the Team Leader completes the remaining steps (domain, payment, submission).

## 2.2 Team Leader

The Team Leader is the participant who creates the team and manages it from formation through to final submission.

### Team Leader Journey (Before Event, Event, Final Hours)



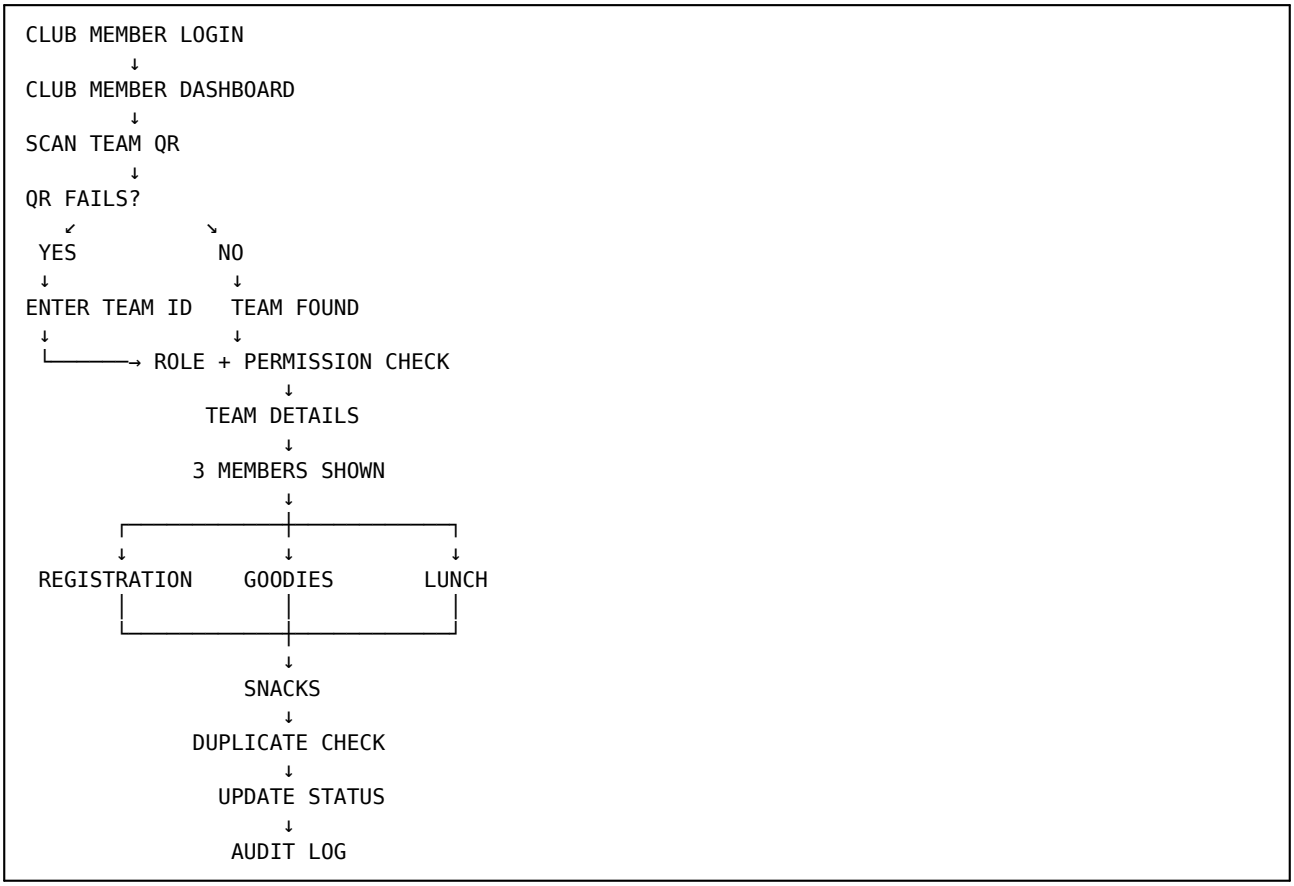
**How it works.**

- **Before the event:** create the team, get 2 members to join, select the domain, submit the team, make the payment and upload proof, and wait for Admin approval. After approval the team is confirmed and the team QR is generated.
- **During the event:** the team works on the project. The QR is shown to the Club Member for entry and distribution.
- **In the final hours:** enter project details, upload the Final PPT (mandatory) and optional GitHub, pitch deck, prototype or other material, then make the final submission.
- **After results:** the Team Leader can view only their own team's evaluation and feedback. Until the Admin publishes results, the screen shows *"Results have not been published yet."*

## 2.3 Club Member

Club Members handle event-day operations. They track what each team has received so that nothing is given twice.

### Club Member Flow



**How it works.**

- The Club Member logs in and opens their dashboard, then scans the team QR.
- If the QR fails, the Club Member enters the Team ID manually. Either way the team is found.
- The system runs a role and permission check, then shows the team details with all 3 members.
- The Club Member marks Registration, Goodies and Lunch, and then Snacks, for the team members.
- Before saving, the system does a duplicate check so the same item is not handed out twice.
- The status is updated and every action is written to the audit log.

## 2.4 Judge

Judges evaluate only the teams the Admin has assigned to them.

### Judge Flow

```
JUDGE LOGIN
      ↓
JUDGE DASHBOARD
      ↓
ASSIGNED TEAMS
      ↓
SELECT TEAM
      ↓
┌──────────────────────────────┐
│ OPTIONAL: VIEW PROJECT       │
│ OPTIONAL: VIEW PPT           │
│ OPTIONAL: VIEW MATERIALS     │
└──────────────────────────────┘
      ↓
EVALUATION FORM
      ↓
ENTER SCORES
      ↓
ADD COMMENTS / FEEDBACK
      ↓
SAVE DRAFT
      ↓
REVIEW
      ↓
SUBMIT EVALUATION
```

### Judge Dashboard

```
JUDGE DASHBOARD
      ↓
ASSIGNED TEAMS
      ↓
SELECT TEAM
      ↓
TEAM INFORMATION
      ↓
OPTIONAL
├── View Project Details
├── View Final PPT
└── View Additional Materials
      ↓
EVALUATION
```

**How it works.**

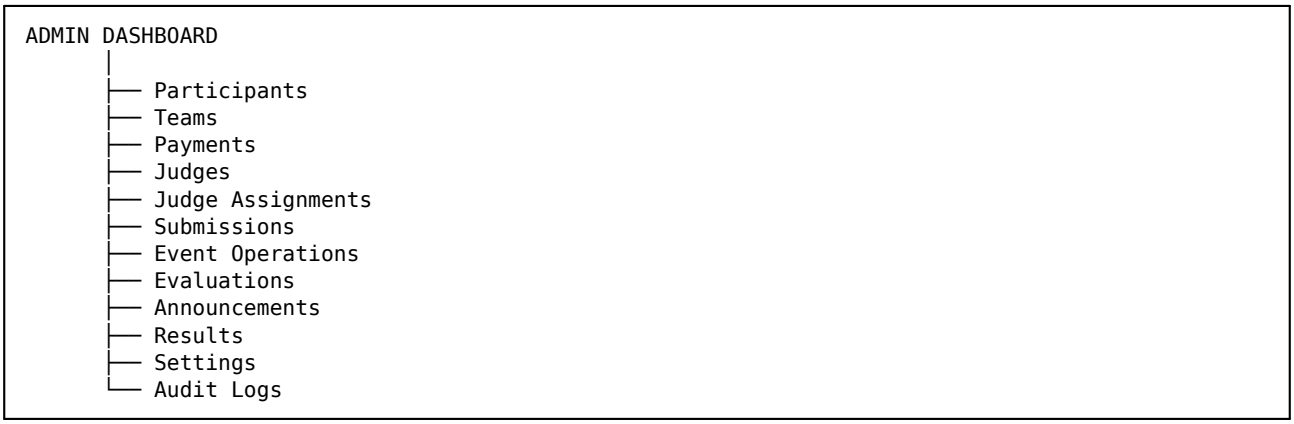
- The Judge logs in and sees the dashboard with the list of assigned teams.
- The Judge selects a team and sees the team information. Viewing project details, the final PPT and additional materials is optional.
- The Judge opens the evaluation form, enters scores and adds comments or feedback.
- The evaluation can be saved as a draft and reviewed. When ready, the Judge submits the evaluation.
- If needed, the Admin can reopen an evaluation.

## 2.5 Admin

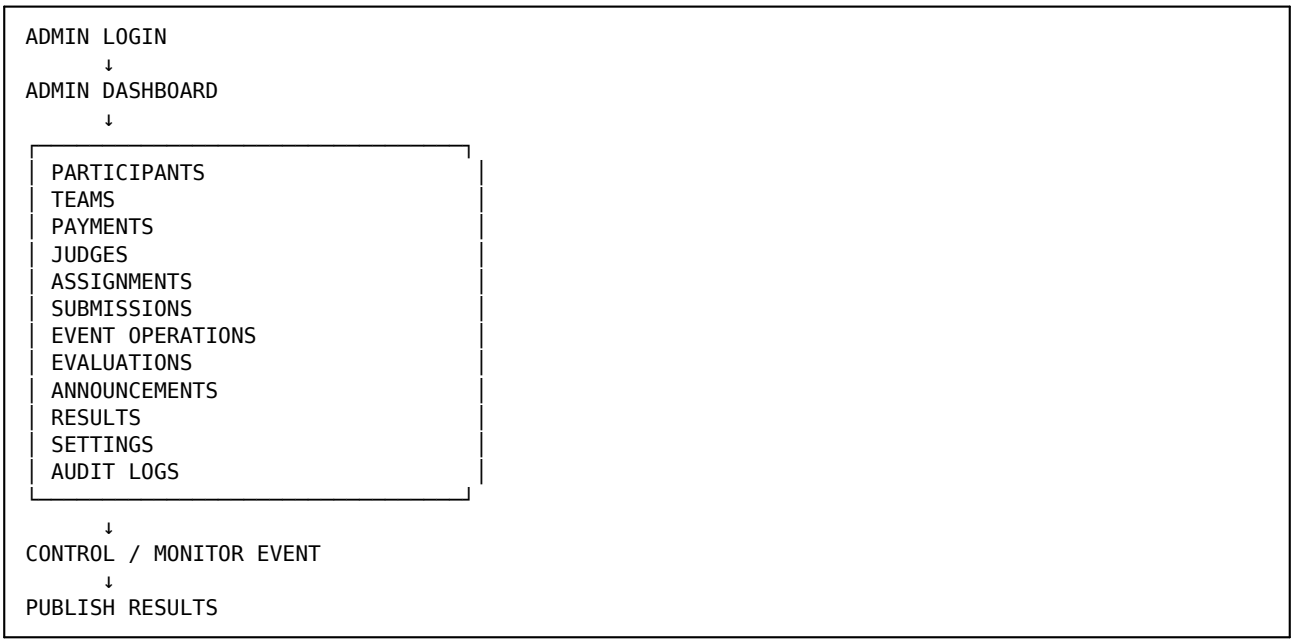
The Admin has full control of the platform. The Admin logs in and works from a dashboard with 12 modules.

### Admin Login

### Admin Dashboard

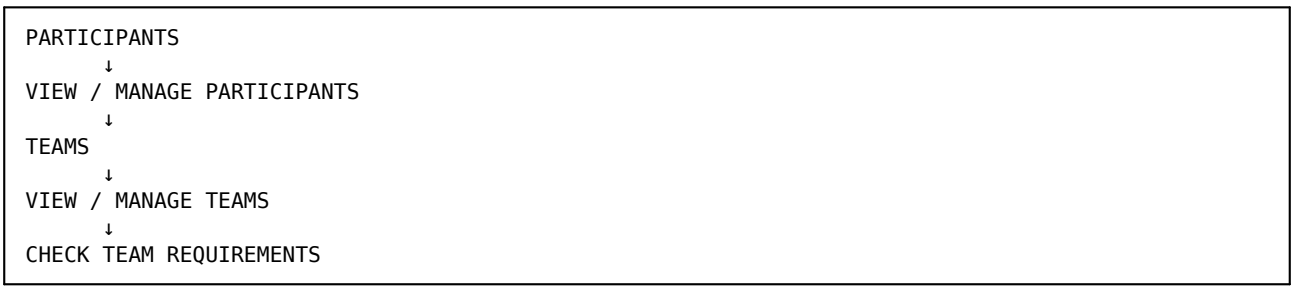


### Complete Admin Flow



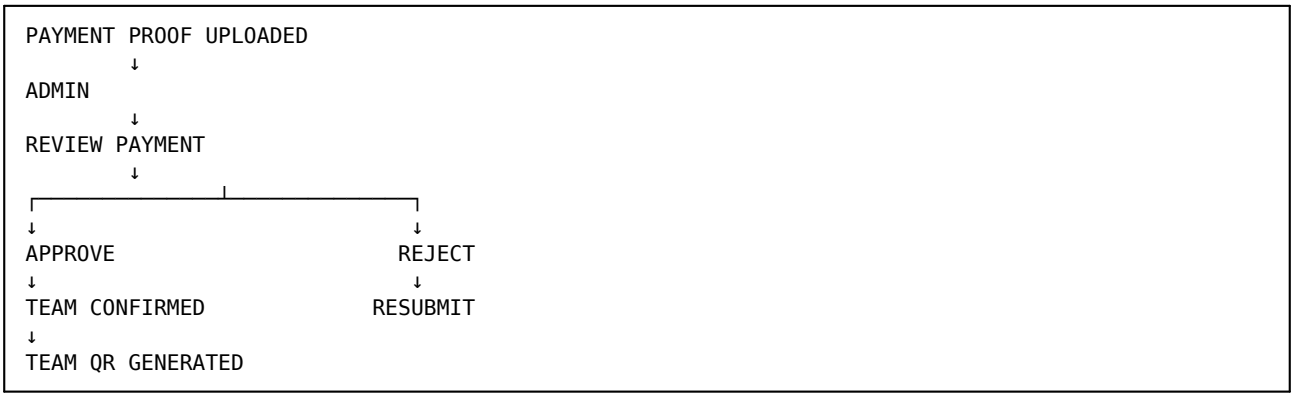
**How it works.** The Admin controls and monitors the whole event, and finally publishes the results. The modules are explained one by one below.

### Participant and Team Management



The Admin can view participants, teams and team members, check team status and requirements, manage Team IDs, lock or reopen teams, and manage team QR generation.

### Payment Verification

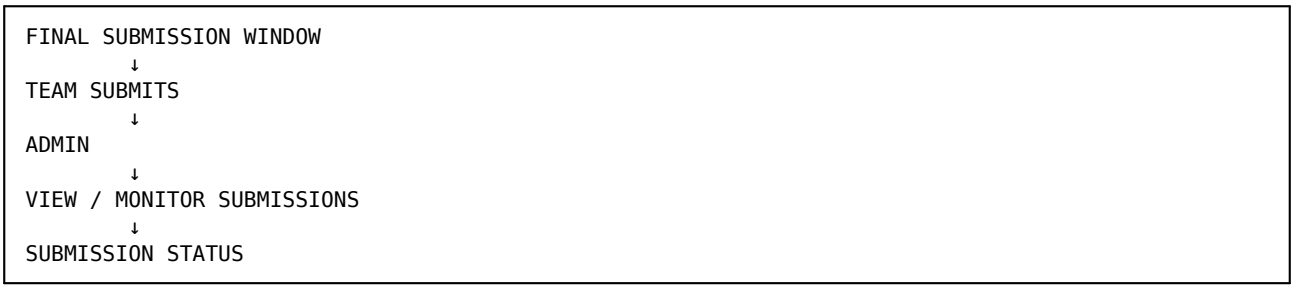


When a team uploads payment proof, the Admin reviews it. **Approve** confirms the team and generates the team QR. **Reject** sends it back to the team to resubmit.

### Judge Management

The Admin adds and manages judges, assigns teams to them, changes assignments when required, monitors evaluation status and can reopen evaluations.

### Submission Management



During the final submission window teams submit their work. The Admin views and monitors submissions and their status. The PPT is mandatory. GitHub repository, pitch deck, prototype or demo and additional material are optional.

### Event Operations

```
EVENT OPERATIONS
      ↓
TEAM QR SCANNING
      ↓
REGISTRATION
      ↓
GOODIES
      ↓
LUNCH
      ↓
SNACKS
      ↓
MONITOR STATUS
```

The Admin monitors event-day activity: QR scanning, registration, goodies, lunch and snacks, along with the related records.

### Evaluation and Results

```
JUDGES SUBMIT EVALUATIONS
        ↓
ADMIN MONITORS
        ↓
REVIEW / MANAGE EVALUATIONS
        ↓
PUBLISH RESULTS
        ↓
TEAM LEADER CAN VIEW
OWN EVALUATION ONLY

Before publication:

RESULTS NOT PUBLISHED
        ↓
TEAM LEADER
        ↓
"Results have not been published yet.\"
```

Judges submit evaluations, the Admin monitors and reviews them, and then publishes the results. Before publication, Team Leaders see the message that results are not yet published. After publication, each Team Leader can access only their own team's evaluation and feedback.

### Event Controls

```
REGISTRATION
     ↓
TEAM FORMATION
     ↓
PAYMENT
     ↓
TEAM CONFIRMATION
     ↓
EVENT
     ↓
FINAL SUBMISSION
     ↓
EVALUATION
     ↓
RESULT PUBLICATION
```

The Admin controls the event stage by stage. Each stage can be **opened**, **locked** or **reopened** when required, so the Admin decides when registration closes, when payments are accepted, when the final submission window opens and when results go public.
